bio packaging

'Eco, Efficient, Exceptional'

What We Do...

Welcome to our comprehensive range of eco-catering disposables.

Green Gate Bio Packaging is proud to offer a wide range of **high quality items** which help to reduce the negative environmental impacts of the catering industry.

We achieve this by:

- ☛ Supplying products which are made from sustainable and renewable resources such as plants and not finite petroleum oil
- ☛ Supplying products which have a relatively low carbon footprint
- ☛ Supplying products which are either recyclable or compostable and therefore do not need to end up in landfill

Example of how our products break down into compost in just a few weeks

We know our products are great - that's why we offer them at **competitive prices** to make it easy for people to switch to them. But, we go further...

We recognise that impeccable customer service isn't as commonplace as it should be in the catering disposables market. At Green Gate Bio Packaging we make it our priority to provide **outstanding customer service** (read our customer comments at the back).

Better for the Environment, Better for your Customers, Better for You

Our customers inform us that using eco disposables has not only lowered their organisations' carbon footprint but it has also provided them with higher revenues through increased customer respect and loyalty.

Delivery

Orders received by 1pm are dispatched the same afternoon on a Next Working Day courier service, FREE of any delivery charge on orders over £75 (net), otherwise a standard charge of £7.50 applies.

Loyalty Rewards Points
